The screenshot shows the NetBrain PE Workstation interface. On the left, a sidebar displays a document titled "EIGRP 100" with the following content:

EIGRP Filtering with Route Maps
Category:
Basic EIGRP Network Statements
Basic redistribution using route-maps
EIGRP filtering with route-maps

Knowledge Points:

- Enable EIGRP routing on specific interfaces, and the eigrp network statements will not cause any newly added interfaces to enable eigrp routing regardless of their IP addresses.
- Redistribute connected route into eigrp routing protocol use route-map to suppress the route being redistributed and set the tag and metric value.
- EIGRP supports route-map filtering as a distribution list with matches on metric and tag

Step-by-Step Instructions:
[View Initial route table and config](#)

Step1: Configure Basic EIGRP networking on all Router's fastEthernet connections and loopback 0 interfaces and put them into AS 100. Disable EIGRP auto-summary to eliminate the discontinuous classful network problem. On R2 and R3, redistribute the route for loopback 192 interface into the eigrp routing protocol with metric value of 10000,100,255,1,1500, set the redistributed route tag on R2 to be 2 and on R3 to be 3.

configure R1:
router eigrp 100
network 1.1.1.1 0.0.0.0
network 11.11.12.1 0.0.0.0
network 192.168.0.1 0.0.0.0
no auto-summary
eigrp router-id 1.1.1.1

configure R2:
router eigrp 100
network 11.11.12.0 0.0.0.0
network 192.168.0.0 0.0.0.0
redistribute connected route-map filter_on_tag in
route-map filter_on_tag deny 10
match tag 2
route-map filter_on_tag permit 20
router eigrp 100
distribute-list route-map filter_on_tag in

configure R3:
router eigrp 100
network 11.11.23.0 0.0.0.0
network 192.168.0.0 0.0.0.0
redistribute connected route-map filter_on_metric in
route-map filter_on_metric deny 10
match metric 400000 -- 500000
route-map filter_on_metric permit 20
distribute-list route-map filter_on_metric in

The main workspace shows a network diagram with three routers (R1, R2, R3) connected in a line. R1 has a loopback interface Lo0(1.1.1.1) and a fastEthernet interface f0/0. R2 has a loopback interface Lo0(2.2.2.2) and fastEthernet interfaces f0/1 and f0/0. R3 has a loopback interface Lo0(3.3.3.3) and fastEthernet interfaces f0/1 and f0/0. The diagram also shows a loopback interface Lo192(192.168.2.2) on R2. Below the diagram, there are three code blocks showing route tables before and after configuration for R1 and R3.
